Fitted CV user guide

Oct 31, 2026 · @Wiebe

Fitted CV gives you a CV fitted to every job ad in a few minutes. It rewrites the lines recruiters read first so they match the ad, using only things you really did, and makes a ready-to-send PDF in each of your languages. Fitted CV is the first product from **FITTED**.

Why fit your CV to each ad? Recruiters first scan job titles, employers and keywords, in seconds. In a study of almost 2 million applications, tailored CVs got **1.85× as many interviews** (Huntr, 2026). Fitted CV makes that tailoring quick, and keeps it honest.

Your first fitted CV in five steps

1. **Bring your CV in.** Import your PDF or Word CV, or your LinkedIn or Indeed profile saved as PDF (section 2).
2. **Connect an AI.** A free one is fine (section 3).
3. **Paste the job link.** Fitted fetches the ad, company and role (section 4).
4. **Draft with AI, then check every line.** Nothing goes on your CV until you confirm it's true (section 5).
5. **Pick a style and build.** You get one PDF per language, plus a row in your applications list (sections 5 and 6).

The rest of this guide walks through every page of the app in the order you meet them.

1. Getting started

Download Fitted from getfitted.nl. It is free for your first 3 jobs.

Device	What to download	First start
Windows 10 or 11	Fitted.exe	Windows may show "Windows protected your PC". Click More info , then Run anyway .
Mac with Apple silicon (M1 or newer)	Fitted-mac-apple-silicon.dmg	Open the file and drag Fitted into Applications . If macOS says it can't check Fitted: System Settings → Privacy & Security → Open Anyway .
Mac with Intel	Fitted-mac-intel.dmg	Same as above.
Android 7 or newer	Fitted-android.apk	Tap the downloaded file. Android asks once to allow installs from your browser: switch on Allow from this source and go back.

These warnings appear only the first time. Updates install from inside Fitted without them.

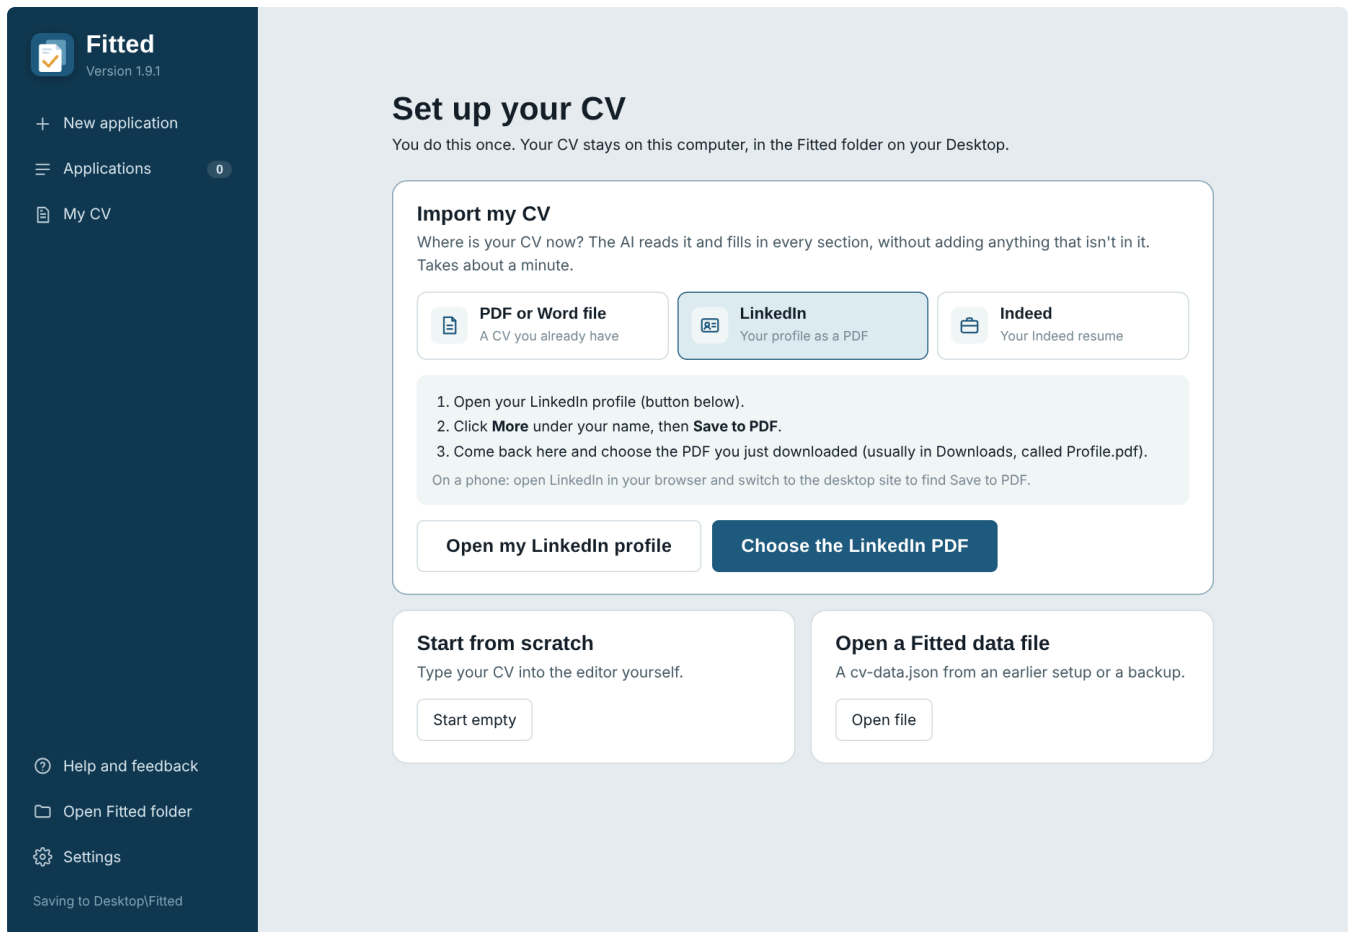

You need an AI account for drafting lines, translating and importing your CV. Several AIs have a free option; Fitted helps you set one up on the next page.

Where your files live

- Windows and Mac: a folder called **Fitted** on your Desktop, with your CV, settings, the applications list (applications.xlsx) and a folder per job with its PDFs.
- Android: inside the Fitted app. Use **Share** to send a PDF anywhere.

2. Set up your CV

You do this once. Fitted turns your existing CV into its own editable version, without adding anything that isn't in it.

Where is your CV now? Pick one of three sources:

Source	What to do
PDF or Word file	Click Choose CV file and pick your CV (.pdf or .docx).
LinkedIn	Click Open my LinkedIn profile , then More → Save to PDF under your name. Come back and click Choose the LinkedIn PDF (usually Profile.pdf in Downloads). On a phone, use the desktop version of the LinkedIn site.
Indeed	Click Open my Indeed profile , open the ⋮ menu at your resume and choose Download . Come back and click Choose the Indeed PDF .

LinkedIn and Indeed don't let other apps read your profile directly, so the PDF download is the way in.

AI that reads your CV. If no AI is set up yet, the box above the button asks for one. Pick a provider, click **Get a key**, paste the key and click **Connect**. See section 3 for which AI to choose.

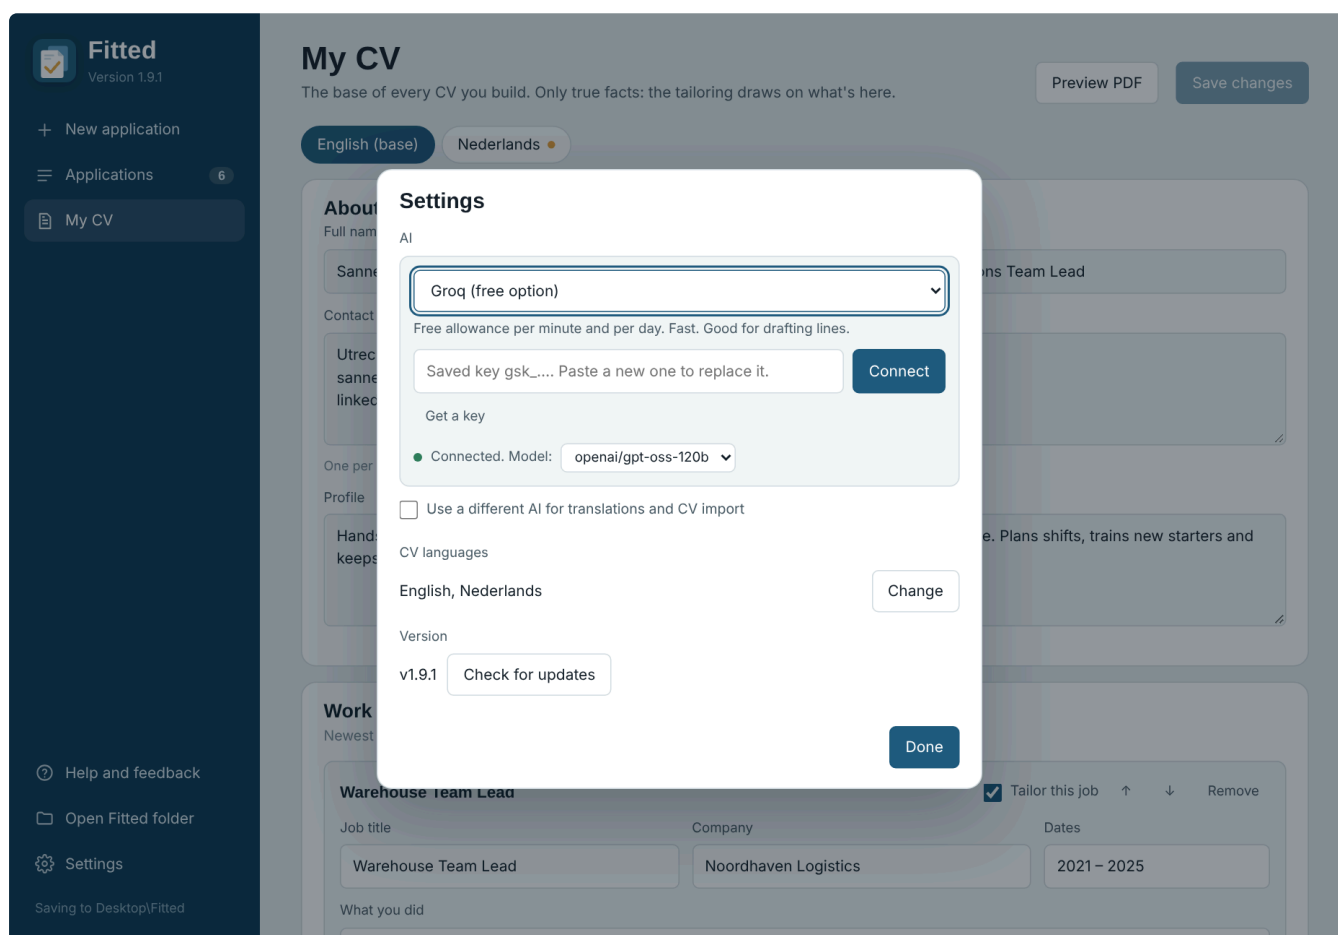

The import takes about a minute. Then Fitted opens **My CV** so you can check every section and click **Save changes**.

Other ways to start

- **Start from scratch:** type your CV into the editor yourself.
- **Open a Fitted data file:** load a cv-data.json from an earlier setup or a backup.

3. Settings: AI, languages, licence

Open **Settings** at the bottom of the sidebar (on a phone: the Settings tab). Your AI key stays on your own device.

Choosing an AI. Fitted uses your own AI account, so you pay the AI provider directly, or nothing on a free plan.

AI	Cost	Good to know
Claude (Anthropic)	Paid per use	Most reliable for translations and CV import.

AI	Cost	Good to know
Google Gemini	Free plan available	On the free plan Google may use what you send to improve its products; Fitted shows a warning.
Groq	Free allowance	Fast; good for drafting lines.
OpenRouter	Free models available	One key for many AI models.
Local AI (Ollama)	Free	Runs on your own computer, nothing leaves it. Install Ollama and download a model first.
Other compatible service	Depends	For services that work like OpenAI's.

Pick one, click **Get a key**, paste it and click **Connect**. Fitted tests the key and picks a suitable model; you can change the model afterwards.

A different AI for translations and CV import. Tick this to use a stronger AI for the heavy jobs (translating your whole CV, importing it) and a cheaper or free one for drafting lines.

CV languages. English is always the base. Click **Change** to add up to 9 more: Dutch, German, French, Spanish, Italian, Portuguese, Swedish, Danish and Norwegian. Your AI translates your CV once; you can check and edit each translation under My CV.

Licence. Shows your free jobs left. After buying, paste your licence key here and click **Activate**. One licence works on 2 devices; use **Deactivate on this computer** to move it.

Version. Shows your version and lets you check for updates.

4. New application

This is where you tailor your CV to one job ad, in three steps on one page.

🔗 Draft with AI

2021 – 2025
Noordhaven Logistics
Default line

2017 – 2021
Kade Retail
Default line

2014 – 2017
De Groene Lantaarn
Default line

Warehouse Team Lead
Noordhaven Logistics, 2021 – 2025

EN English 60 / 200

Trained new starters and kept picking accuracy above target.

NL Nederlands 67 / 200

Werkte nieuwe collega's in en hield de pickkwaliteit boven de norm.

- Led a team of 40 pickers and packers across two shifts in a 30,000 square metre distribution centre.
- Your tailored line goes here**
- Cut order picking errors by redesigning slotting and label checks.
- Trained new starters and ran weekly safety briefings.

Step 1: Job listing

1. Paste the link to the job ad and click **Fetch listing**. Fitted fills in the company, the role and the apply link. Check them.
2. A site won't load? Open **Listing text**, and paste the ad text you copied from your browser.
3. The badge at the top right says which CV to send, based on the ad's language (for example "Send the Dutch version").

On Android you can also start from the ad itself: tap **Share** on a job ad in your browser, LinkedIn or a job app, and choose **Fitted**.

Step 2: Tailor your experience

The screenshot shows the Fitted application interface. On the left is a dark blue sidebar with the Fitted logo (Version 1.9.1) and navigation options: '+ New application', 'Applications' (5), 'My CV', 'Help and feedback', 'Open Fitted folder', 'Settings', and 'Saving to Desktop\Fitted'. The main area is titled '2 Tailor your experience' with the subtitle 'one true line per role' and a 'Draft with AI' button. At the top, there are input fields for 'Company' (Maas Distribution), 'Role' (Teamleider Warehouse), and 'Apply link' (https://werkenbij.maasdistribution.n). Below this is a 'Listing text (571 characters)' field. The main content area is divided into two columns. The left column lists three jobs: '2021 – 2025 Noordhaven Logistics' (Drafted: review), '2017 – 2021 Kade Retail' (Drafted: review), and '2014 – 2017 De Groene Lantaarn' (Drafted: review). The right column shows the details for the 'Warehouse Team Lead' role at 'Noordhaven Logistics, 2021 – 2025'. It includes a yellow note: 'Matches the ad: Ervaring met personeelsplanning in ploegendienst'. Below this are two text boxes for 'EN English' (79 / 200) and 'NL Nederlands' (88 / 200). The English text is 'Planned staffing for two shifts and covered peak weeks without agency overtime.' and the Dutch text is 'Plande de bezetting voor twee ploegen en ving piekweken op zonder extra uitzendkrachten.' Below the text boxes is a list of facts: 'Led a team of 40 pickers and packers across two shifts in a 30,000 square metre distribution centre.', 'Your tailored line goes here' (highlighted), 'Cut order picking errors by redesigning slotting and label checks.', and 'Trained new starters and ran weekly safety briefings.' At the bottom of the right column is a 'Reset to default' button. The bottom section is titled '3 Build' and contains the text: 'You'll confirm each changed line first. Then a PDF is made in each of your languages and the job is added to your applications.' and a 'Build CVs' button.

1. Click **Draft with AI**. For each job, the AI writes one line that matches what the ad asks for, using only facts from that job and your extra facts.
2. The yellow note shows which requirement in the ad the line answers.
3. Click each job on the left to review its line, in every language. Change the wording freely; the line should stay true and under 200 characters.
4. The list under the text box shows where the line goes: as the second point of that job.
5. **Reset to default** puts back that job's standard line.

Dots on the left: grey = default line, amber = drafted by the AI and not yet reviewed, green = checked by you.

Fitted Pro extras (also included in the free trial)

- **Reworded points:** up to 2 more points per job, reworded for the ad with the same facts. They appear under the job's line; **Keep the original** undoes one.
- **Profile and skills for this ad:** under the jobs, your profile rewritten for the role and your skills with the most relevant first. **Keep my own profile** and **Keep my order** undo them.

With Fitted (not Pro) these places show a **Get Pro** button.

Step 3: Build

Click **Build CVs**. You first confirm each changed line (next section), then Fitted makes a PDF in each of your languages and adds the job to Applications.

Start over (top right) clears the page for the next job.

5. Confirm each changed line

Nothing is built until you have confirmed every changed line. Recruiters ask about what's on your CV, so each line has to be something you can talk about.

The screenshot shows the Fitted application interface. On the left is a dark sidebar with the Fitted logo (Version 1.9.1) and navigation links: '+ New application', 'Applications' (with a badge '5'), 'My CV', 'Help and feedback', 'Open Fitted folder', 'Settings', and 'Saving to Desktop\Fitted'. The main area displays job details for 'Maas Distribution' (Role: Teamleider Warehouse, Apply link: https://werkenbij.maasdistribution.n). A modal dialog titled 'Step 1 of 4 Noordhaven Logistics: Warehouse Team Lead 2021 - 2025' is open. It shows a requirement from the ad: 'Ervaring met personeelsplanning in ploegendienst' (highlighted in yellow). Below are two new lines: 'Planned staffing for two shifts and covered peak weeks without agency overtime.' in English and 'Plande de bezetting voor twee ploegen en ving piekweken op zonder extra uitzendkrachten.' in Dutch. A dashed box indicates the new line replaces the default line: 'Trained new starters and kept picking accuracy above target.' At the bottom of the dialog is a green bar with a checked box and the text 'This is true for this role, and I can back it up in an interview.' Below the dialog are buttons: 'Cancel', 'Edit this line', and 'Confirm and continue'. At the bottom of the main area, a '3 Build' section explains that each changed line must be confirmed before a PDF is made and the job is added to applications. A 'Build CVs' button is visible on the right.

For each job with a new line you see:

- the requirement in the ad it answers (yellow);
- the new line in each language;
- the default line it replaces.

With Pro, reworded points are listed in the same step as the job's line, and a separate step shows your new profile. You confirm those the same way.

Tick **This is true for this role, and I can back it up in an interview**, then click **Confirm and continue**.

- **Edit this line** takes you back to change the wording.
- **Back** returns to the previous job.

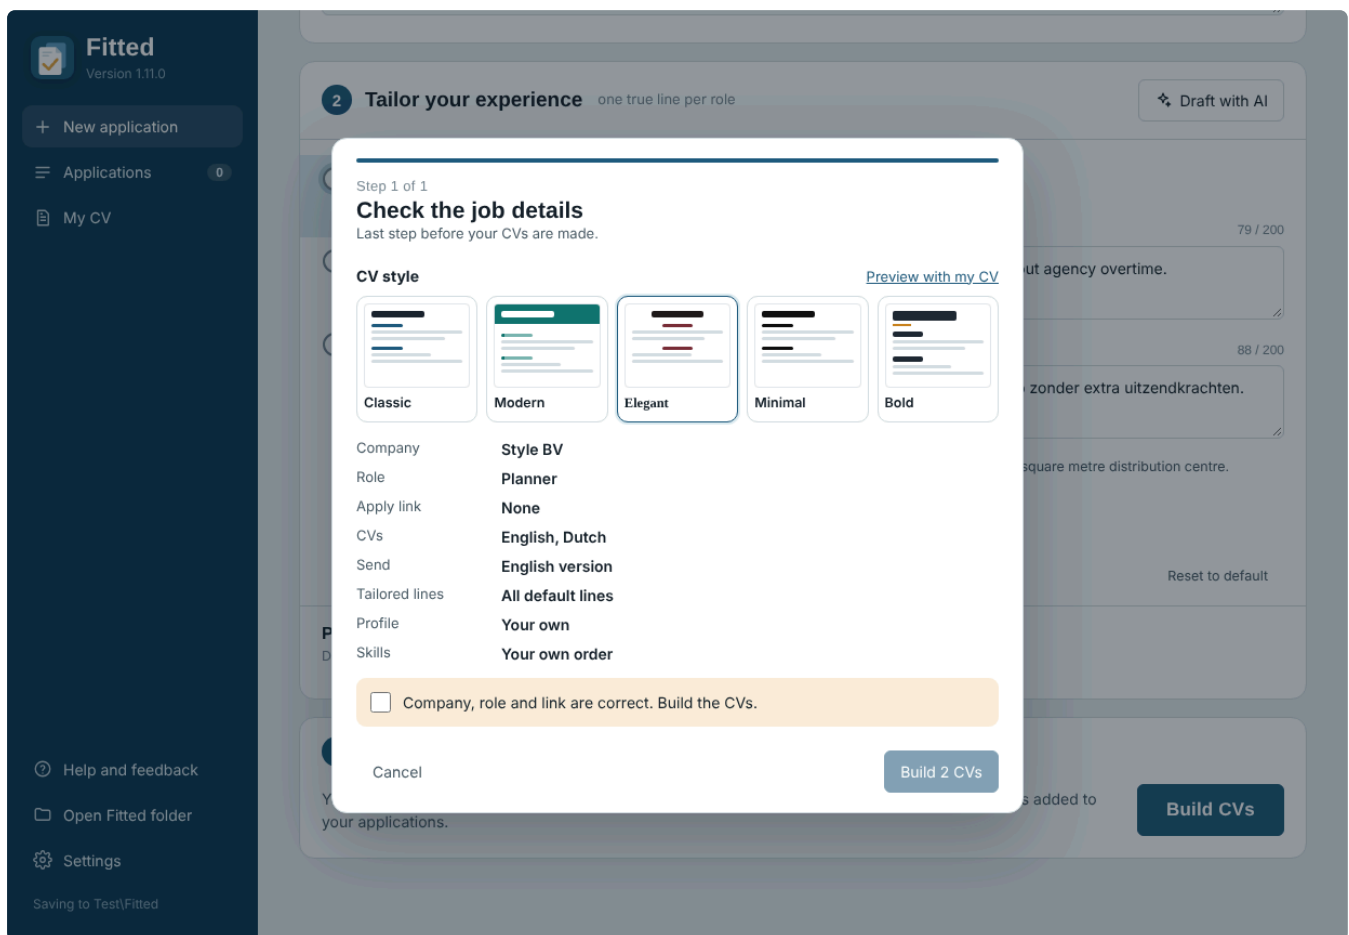

- **Cancel** stops without building anything.

The last step, **Check the job details**, shows the company, role, apply link, languages and which version to send. Tick that they are correct and click **Build**.

CV style. On that last step, choose how your CVs look:

- **Classic:** petrol blue, spaced headings.
- **Modern:** a teal header band.
- **Elegant:** serif type, burgundy.
- **Minimal:** black and grey.
- **Bold:** large name, amber accents.

Click **Preview with my CV** to open your own CV in the chosen style. Fitted remembers your choice for the next job, and **Preview** in My CV uses it too.

6. Your CVs are ready

After building, a green box shows your PDFs, one per language, and which one to send.

The screenshot shows the Fitted application interface. On the left is a dark blue sidebar with the following elements:

- Fitted** Version 1.9.1
- + New application
- ≡ Applications **6**
- 📁 My CV
- 🔗 Help and feedback
- 📁 Open Fitted folder
- ⚙️ Settings
- Saving to Desktop\Fitted

The main workspace is divided into two sections:

Top Section: Warehouse Team Lead
 Noordhaven Logistics, 2021 – 2025
 Matches the ad: Ervaring met personeelsplanning in ploegendienst

Below this, there are two language tabs: **EN** English (79 / 200) and **NL** Nederlands (88 / 200). The English tab is active, showing the text: "Planned staffing for two shifts and covered peak weeks without agency overtime." The Dutch tab shows: "Plande de bezetting voor twee ploegen en ving piekweken op zonder extra uitzendkrachten."

Below the text are three bullet points:

- Led a team of 40 pickers and packers across two shifts in a 30,000 square metre distribution centre.
- **Your tailored line goes here**
- Cut order picking errors by redesigning slotting and label checks.
- Trained new starters and ran weekly safety briefings.

At the bottom of this section, it says "Only facts from this role. Keep it to two lines." and a "Reset to default" button.

Bottom Section: Build
 3 Build
 You'll confirm each changed line first. Then a PDF is made in each of your languages and the job is added to your applications.

A green box indicates: **2 CVs are ready**
 Saved in Fitted\output\Maas_Distribution_Teamleider_Warehouse and added to your applications. **Send Dutch**

Below the green box are four buttons: "Open English", "Open Nederlands", "Open folder", and "See applications".

- **Send ...** (green label): the version that matches the ad's language. Send that one.
- **Open English / Open Nederlands:** opens the PDF.
- **Open folder** (Windows and Mac): the job's folder inside Fitted on your Desktop. On Android you get **Share** buttons instead, to send a PDF by email, WhatsApp or to a job site.
- **See applications:** jumps to your applications list.

Changing a line after building. The tailored line in each PDF is an editable field: click it in a PDF reader such as Edge, Chrome or Acrobat and type. Or change it in Fitted and build again: the same job is updated, not added twice.

7. Applications

Every job you build CVs for lands here, newest first, with its status and files. The list is also saved as applications.xlsx in your Fitted folder.

My CV

The base of every CV you build. Only true facts: the tailoring draws on what's here.

English (base) Nederlands

Preview PDF Save changes

About you

Full name: Sanne Bakker

Headline: Warehouse & Operations Team Lead

Contact details: Utrecht, Netherlands
sanne.bakker@example.nl
linkedin.com/in/example

One per line: place, phone, email, LinkedIn.

Profile: Hands-on team lead with nine years in warehousing, retail operations and customer service. Plans shifts, trains new starters and keeps teams calm and productive during peak season.

Work experience

Newest first. Untick "Tailor this job" for jobs that should stay as they are, like an early side job.

Job title	Company	Dates	Tailor this job	↑	↓	Remove
Warehouse Team Lead	Noordhaven Logistics	2021 – 2025	☒			

What you did

Language tabs. English (base) and each extra language have their own tab. When you change the English version, the other languages get an amber dot and an **Update translation** button. Translations can also be edited by hand.

Sections

- **About you:** name, headline, contact details (one per line), profile.
- **Work experience:** one card per job, newest first. Fill in job title, company, dates and what you did (one point per line).
 - **Tailor this job:** untick it for jobs that should stay as they are, such as a student job. Those never get a tailored line.
 - **Default tailored line:** the second point of that job when you don't tailor for an ad. A true fact, under 200 characters.
 - The arrows move a job up or down; **Remove** deletes it.
- **Key achievements, Skills, Languages, Certifications, Education, References.**
- **Extra true facts:** things that are true but not written on your CV. The AI may use them when tailoring lines, and nothing else. One per line, and be specific about what you did and didn't do.
- **Headings:** rename section headings per language if you like.

Buttons

- **Preview PDF:** shows the CV as it will look.
- **Save changes:** lights up once you change something. Leaving My CV with unsaved changes asks whether to save.
- **Replace with a new CV file:** imports a new CV (section 2). Your current CV is kept as a backup in the Fitted folder.

9. Help, updates and your licence

Fitted
Version 1.9.1

📄 My CV

🔍 Help and feedback

📁 Open Fitted folder

⚙️ Settings

Saving to Desktop\Fitted

Help and feedback

Short answers to common questions, and a direct line to the maker.

How it works

1. **Paste a job ad.** Put the link under New application and click Fetch listing. If a site won't load, paste the ad text instead.
2. **Tailor one line per job.** Click Draft with AI, or write the lines yourself. Each line has to be true for that job.
3. **Confirm and build.** Tick each changed line, then Fitted makes a PDF in every language you use and adds the job to Applications.

Questions

- > Which AI should I use?
- > How do I get an AI key?
- > A job site won't load the listing
- > Why do I have to confirm every changed line?
- > Can I change a line after the PDF is made?
- > How do languages work?
- > Where are my files?
- > What is sent over the internet?
- > Windows says "Windows protected your PC"
- > How do updates work?

Send feedback

Found a problem, have an idea, or stuck? It goes straight to the maker: help@getfitted.nl

Help and feedback. Short answers to common questions, and a form that goes straight to help@getfitted.nl. Choose Problem, Idea or Question, write a few words and click **Open in email** (or **Copy instead**). Leave **Add app version and system version** ticked: it helps fix problems faster.

Updates. Fitted checks for a new version when it starts. A banner appears: click **Update and restart** (Android: **Update**). Your CV, settings and applications are never touched. On a Mac, keep Fitted in your Applications folder so it can update itself. On Android, allow Fitted to install updates the first time it asks.

Free trial and licence

- Fitted is free for your first 3 jobs. Building again for a job you already did doesn't count.

- After that, buy Fitted (€15: one tailored line per job) or Fitted Pro (€25: up to 3 lines per job, plus profile and skills for each ad), once, from the sidebar or Settings. Activate it with the key from your purchase email. Already have Fitted? Settings → Upgrade to Pro (€10).
- One licence works on 2 devices, in any mix of computers and phones.
- Everything you made during the trial stays yours.
- Not happy? Within 14 days you get your money back: email help@getfitted.nl with your order number.

10. Troubleshooting

Problem	What to do
A job site won't load the listing	Some sites need a login or block apps. Copy the ad text in your browser and paste it under Listing text .
"Set up an AI first"	Open Settings → AI , paste a key and click Connect .
The AI gives an error or limit message	Free plans have limits per minute or day. Wait a moment, or pick another AI in Settings.
CV import says hardly any text could be read	The file is probably a scanned image. Use a PDF with real text, a Word file, or start from scratch.
"A file is open in another program"	Close applications.xlsx in Excel, or the PDF, and try again.
Windows says "Windows protected your PC"	Click More info , then Run anyway . Only the first time.
Mac says Fitted can't be opened	System Settings → Privacy & Security → Open Anyway . Only the first time.
Android won't install the file	Allow installs from your browser (or, for updates, from Fitted) when Android asks.
Mac update says to move Fitted	Drag Fitted into your Applications folder, open it from there and update again.
Something else	Help and feedback → Send feedback , or email help@getfitted.nl .

Source for the interview figure: Huntr, [Job Search Trends Q2 2026](#). The figure shows that tailored CVs and more interviews go together; it doesn't prove that tailoring causes them, and nobody can promise you interviews.
